What Is Twitter?

What is Twitter? Well, where have you been.. LOL? Twitter would have to be the fastest growing site on the web today. It is taking the internet by storm and there are around 10,000 new users per day signing up to participate in this internet revolution.

Twitter is best described as a micro blogging platform. You are limited to 140 characters each time you do an update, which initially, may seem a small amount. However, as you become more experienced, it's just amazing what you can fit into 140 characters.

That said, Twitter is much, much more than that. It is like one huge global chat room, but then again, it doesn't have to be. It all depends on how many people you follow on Twitter. If it's in the thousands, then your "Tweetstream" will be running fast and furious with everything that's coming in. If you are only following a few hundred, or even less, then things are much easier to keep up with.

Twitter is also a great way to meet new people online, particularly those with similar interests to you. I will show you how to do this more as we progress thorough this report.

How To Set Up

Setting up on Twitter to have your own account is easy, but there are a few things that you should be aware of when organizing your account. This can apply even if you already have an existing account too, so consider these tips and it can improve your entire Twittter experience.

The first thing to do if you don't have an account is go to <http://www.twitter.com> which is the home page of Twitter. You will be asked to either login or register. If you don't have an account, then of course you will need to register. So let's go through the registration process and explain it all here.

Twitter for the Tweeple

You have just read the first pages of this ebook.

The full product includes the complete PDF, the editable source file, cover graphics and a private label rights licence. Edit it, put your name on it and sell it as your own.
