IMPORTANT: This guide is written for those that already have the basics skills of setting up a simple website. It is written for those that have the basic knowledge to register a domain name and upload a website to the internet.

However, if you do not know anything about setting up your own website or even registering a domain name don't worry! This guide will still help you a great deal, and teach you the basics of setting up you very own highly profitable affiliate business.

So let's get started!

Finding An “Ideal Plan” For Affiliate Success

Truthfully, there is no “Ideal Plan” for affiliate success because everyone is different and have varied thoughts and perceptions about what success means to them...

Your individual, skills, interests, and overall goals will affect how you decide to organize your network of affiliate sites. The important lessons to take away from this course will be how to produce and grow a network of websites, how to make them viral, and how to promote them for search engine rankings and traffic.

What this guide is not, is telling you how to use your time, efforts and money. This guide allows you to work at your own pace, and take it one step at a time.

Only when you actually start the process, and continue to work your own personalized plan, will be able to see results!

Determining a personal plan of action is the first step you should take. Eventually, results will come that will allow you to stop working for someone else and continue to grow your own business.

The “IDEAL PLAN” so to speak, should be to FOCUS every action you take to making your Internet presence more productive and therefore more valuable to YOU – not someone else.
