Chapter 1

Introduction

With all the information out there in the news and on the internet most people are at least aware of pollution problems. The issue is more serious in some areas but the fact remains that we all contribute to it. The concern is that with more people on Earth now and more pollution we are harming our environment.

Since we breathe the air that is out there what is in it should be a top concern for each of us. Yet we often go about it without thinking twice about it. There are enough individuals suffering from health concerns due to what they have been breathing in for years.

With all of the pollutants out there right now, imagine what it will be like for future generations. You may not care much as you won't be around. Yet you will have family who will need to deal with the problems. Even your own children and grandchildren who are the next generations will be affected by it.

Each of us has the power to make some positive changes though. Some people believe that living green is a waste of time because you are only one person. Yet if the educational information out there about it could encourage many individuals to all do their part it would have quite a significant impact overall.

The efforts of only one person over the course of their lifetime will significantly reduce the amount of pollution out there. Teaching children from a young age what they can do and why will allow that process to continue being implemented in our society as well.

We also have the responsibility to let the government and businesses know that we expect them to take action. Buy what you can from companies that do have
