Introduction

Firstly, let me say Thank you for purchasing this report, I am sure you will find the content in this report invaluable when looking to create your own products.

The reason I have created this report is to help other people get started with product creation as this can seem like a daunting task, but believe me when I say it is also the most profitable step you can take!

There is a lot of information on the web about how to create your own products but not many of these sources provide a clear and concise step by step guide so you can get your product out there and making money in the quickest time possible!

So that is what I am going to attempt to do here. :)

I am confident if you follow the steps within this report you will have your very own killer product that will bring in sales for years to come.

Right let's get started!

Step 1: The Right Mindset Means A Lot!

Welcome to Step 1 the reason I thought I would include this step which really has nothing to do with product creation, is because you will need the right mindset to get the most out of this report.

The hardest thing I found and probably many other people do when getting started with any aspect of Internet Marketing is the hard work it involves.

I am not sure how you got interested in Internet Marketing but if you were like me you have probably been pulled in at some point, by all the websites out there that promise untold riches for 5 minutes work!

Don't get me wrong this is indeed possible, but in my experience not when you are getting started. It is indeed a reality if you have a list of 3,000 responsive buyers that you can send out an email that will make you thousands of dollars within a few days.

Although to start off you need to create that product and build that list and unfortunately that will require some good old fashioned elbow grease!

So you will need the correct mindset and I am not going to write pages and pages of motivation for you, except to answer the number one question that stops people taking action or makes them give up in my experience.

I know this question comes up and can be very hard to overcome because I have asked myself the same question plenty of times when I was getting started with Internet Marketing.

Here is the question or questions I found myself asking when I was getting started:

“Is this going to work?”

“Is all this work worth it?”

“Will my product sell?”

These are the three main questions that I found myself asking when I was creating my own product.

Well take it from me the answer to all those questions is “Yes it really does work!”.
