12 Must Have Products That Will Keep Your Child Safe Around The Home

About 2–1/2 million children are injured or killed by hazards in the home each year. The good news is that many of these incidents can be prevented by using simple child safety devices on the market today.

You can childproof your home for a fraction of what it would cost to have a professional do it. And safety devices are easy to find. You can buy them at hardware stores, baby equipment shops, supermarkets, drug stores, home and linen stores, and through mail order catalogues.

Here are some child safety devices that can help prevent many injuries to young children. The red numbers correspond to those on the image following the text.

1. Use Safety Latches and Locks for cabinets and drawers in kitchens, bathrooms, and other areas to help prevent poisonings and other injuries. Safety latches and locks on cabinets and drawers can help prevent children from gaining access to medicines and household cleaners, as well as knives and other sharp objects.

Look for safety latches and locks that adults can easily install and use, but are sturdy enough to withstand pulls

and tugs from children. Safety latches are not a guarantee of protection, but they can make it more difficult for children to reach dangerous substances.

Typical cost of a safety latch or lock: less than \$2.

2. Use Safety Gates to help prevent falls down stairs and to keep children away from dangerous areas. Safety gates can help keep children away from stairs or rooms that have hazards in them. Look for safety gates that children cannot dislodge easily, but that adults can open and close without difficulty. For the top of stairs, gates that screw to the wall are more secure than "pressure gates."

Typical cost of a safety gate: \$13 to \$40.

3. Use Door Knob Covers and Door Locks to help prevent children from entering rooms and other areas with possible dangers. Door knob covers and door locks can help keep children away from places with hazards, including swimming pools.

Be sure the door knob cover is sturdy enough not to break, but allows a door to be opened quickly by an adult in case of emergency. By restricting access to potentially hazardous rooms in the home, door knob covers could help prevent many kinds of injuries.

Typical cost of a door knob cover: \$1 and door lock: \$5 and up.
